Grease Interceptors with Semi-Automatic Draw-Off, Series 802 - 803

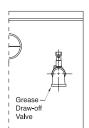

Product Description: Recommended for retaining, then removing fat, oil, and grease from wastewater in kitchen and restaurant areas where food is prepared. The semi-automatic draw-off grease interceptor is constructed of coated fabricated steel with no-hub connections and separate flow control; a non-removable baffle; diamond plate, non-skid cover; draw-off pipe and valve.

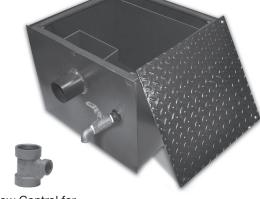

The semi-automatic draw-off feature permits grease removal without removing the cover.

Features and Benefits:

- Slip-resistant diamond plate cover
- Designed to be installed in above-the-floor installations or recessed where space is limited
- Constructed of fabricated steel.
- Regularly furnished with no-hub inlet and outlet, threaded available
- Low type grease interceptor is designed to be installed under the sink or in an area where space is limited
- Draw-off eliminates the messy cleaning job associated with ordinary grease interceptors
- Conforms to PDI Grease Interceptor Standard PDI-G101
- IAPMO Listed, File No. 2697 and C-3878
- Figure Numbers 802-Y & 802-T series, CSA Certified (7-50 GPM).

Flow Control for Series 802-803
